- **Test Frameworks: Cucumber-BDD, Webdriver.io, TestNG, Java Hybrid Framework,**

EXPERIENCE:

Company -Infosys

Project Details:

Project name : Pepsico
Client name : Pepsi Co, America
Type Of Testing: Android Application Automation
Tools : Appium with Wdio
Role : Test Analyst
Team Size : 2

Project Description:

Pepsi Co: Multinational food and beverage company, formed in 1965 through the merger of Pepsi-Cola and Frito-Lay. Global leader with a diverse product portfolio, including popular brands like Pepsi, Lay's, and Gatorade. In Pepsico, have automated 2 mobile applications like Stores and Image in Android.

Responsibility:

- Led the creation, review, and analysis of automation test cases and scripts to ensure comprehensive testing coverage
- Proven ability to understand and meticulously review project requirements, aligning testing efforts with project goals.
- Developed test automation framework using page object model
- Responsible for developing automation script by converting manual test case into scripts
- Developed new automation scripts tailored for regression and smoke testing, consistently optimizing scripts for improved performance.
- Successfully executed and ran automation scripts, validating software functionality and ensuring adherence to established testing standards.
- Maintained detailed documentation for test cases, scripts, and modifications, ensuring transparency and knowledge transfer.

Project Details:

Project name : Pernod Ricard

Client name : Pernod Ricard, France

Type Of Testing: IOS Application Automation

Tools : Appium with Java Cucumber BDD

Role : Senior Test Engineer

Team Size : 2

Project Description:

Pernod Ricard is a global leader in the wine and spirits industry, known for its prestigious portfolio of brands. During my project at Pernod Ricard, I have automated mobile applications like MyOrders, Accounts, Contacts in IOS. Each application presented unique functionalities, and I streamlined the execution process through a unified framework, showcasing adaptability and efficiency in test automation.

Responsibility:

- Developed, reviewed, and analyzed automation test cases and scripts for comprehensive testing coverage.
- Developed test automation framework using page object model as a hybrid framework
- Responsible for developing automation script by converting manual test case into scripts
- Performed Smoke tests using the automation framework to quickly validate basic functionality.

Resume of Bala Vinayagam
